Nimesh Akalanka Hettiarachchi

Full Stack Developer | Software Engineer | AI Engineer

Matara, Sri Lanka | +94 71 76 51 505 | akalankanime24@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Information Systems undergraduate and Full Stack Developer with hands-on experience building production-oriented web applications, AI-powered systems, business software, and automation solutions. Experienced across frontend and backend development, REST APIs, databases, AI/LLM integration, vector search, RAG-based applications, image processing, and cloud deployment. Proficient in JavaScript, TypeScript, Python, React, Next.js, Node.js, MongoDB, PostgreSQL, and modern AI technologies. Freelance developer with client-facing experience in Telegram bot development since 2021. Strong problem-solving and collaboration skills with a focus on Full Stack Engineering and AI Engineering.

Education

B.Sc. (Hons) in Information Systems 2024 – Present
Sabaragamuwa University of Sri Lanka

G.C.E. Advanced Level 2022/2023
Physical Science Stream
ST.Thomas College, Matara.

Technical Skills

Programming: Java, JavaScript, TypeScript, Python, C, SQL, Ruby

Web Development: HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, Python, REST APIs, Telegram Bot API

Databases: MongoDB, MySQL, PostgreSQL, Netlify DB

AI / ML: Python, AI/ML, AI API Integration, RAG, LLM Integration, Vector Search, Image Processing, Gradio

AI Technologies: Google Gemini API, Anthropic Claude API, LangChain, Pinecone

Tools & DevOps: Git, GitHub, Docker, GitHub Actions, Postman, Vercel, Netlify, Cloudflare, Hugging Face, Firebase

Other: Responsive Web Development, Database Design, PDF Generation, Telegram Bot Development, CI/CD

Selected Projects

JusticePal – AI Legal Assistance Platform Live Demo
Next.js / React / AI / Vector Search / Full Stack

- Developed an AI-powered legal assistance platform for case intake, legal information, lawyer recommendation, and appointment scheduling.
- Implemented AI-assisted case analysis and lawyer matching using vector-based search concepts.
- Built lawyer profiles and an appointment scheduling workflow with a responsive modern interface.
- Designed the system to support practical legal information access including Sinhala-language assistance.

GitHub Repository

AI Watermark Remover Live Demo
Python / AI/ML / Image Processing / Gradio

- Developed an AI-powered application for removing watermarks from both images and videos.
- Applied image-processing and AI-based approaches for watermark detection and removal.
- Optimized the processing workflow to produce practical high-quality outputs.
- Deployed the application as an interactive Hugging Face Space.

GitHub Repository

Hotel Order Management & Billing System Live Demo
JavaScript / Python / Database / PDF Generation

- Designed and implemented a hotel billing and order management system for managing appointments, orders, and invoices.
- Created an intuitive interface designed around practical hotel staff workflows.
- Implemented automated invoice/PDF generation and database-backed business operations.

GitHub Repository

ALL Save Bot Live Demo

Python / Pyrogram / Telegram Bot API / MongoDB

- Built a Telegram bot for downloading and saving media from multiple platforms in one place.
- Integrated APIs and automated media-processing workflows for convenient content handling.
- Used Python, Pyrogram, Telegram Bot API, and MongoDB.

GitHub Repository

Certifications

- **Python for Beginners** *University of Moratuwa*
- **Postman API Fundamentals Student Expert** *Postman*
- **Hacktoberfest 2025: Supercontributor** *DigitalOcean - Hacktoberfest*
- **Artificial Intelligence Essentials** *Coursera - University of Pennsylvania*

Experience

Freelance Telegram Bot Developer *2021 – Present*

Fiverr & Upwork

- Develop and maintain Telegram bots and automation solutions for clients through freelance platforms including Fiverr and Upwork.
- Build custom bots using Python, Telegram Bot API, Pyrogram, APIs, databases, and automated workflows.
- Analyze client requirements and transform them into practical, user-focused automation solutions.
- Integrate external APIs and services to extend bot functionality and automate repetitive tasks.
- Communicate directly with clients throughout development, testing, delivery, and maintenance.

Independent Full Stack Developer *2024 – Present*

- Design, develop, deploy, and maintain full-stack web applications and software solutions for personal and real-world business use cases.
- Work across frontend development, backend APIs, database integration, authentication, deployment, and debugging.
- Deploy applications using platforms including Vercel, Netlify, GitHub Pages, and Cloudflare.
- Develop responsive websites and digital solutions for small businesses and hospitality-related businesses.

Soft Skills

- Problem Solving
- Teamwork and Collaboration
- Good Communication
- Time Management
- Adaptability
- Continuous Learning

Additional

- Active GitHub developer with multiple real-world projects.
- Experience developing and deploying applications independently from idea to production.
- Strong interest in learning new technologies and building scalable, practical applications.
- Strong interest in Full Stack Engineering, AI Engineering, LLM applications, backend architecture, cloud technologies, and automation.
